

PrediKtoR by KAX Group

Unlock the Power of VEKTOR DIREKTOR Models in Your Applications

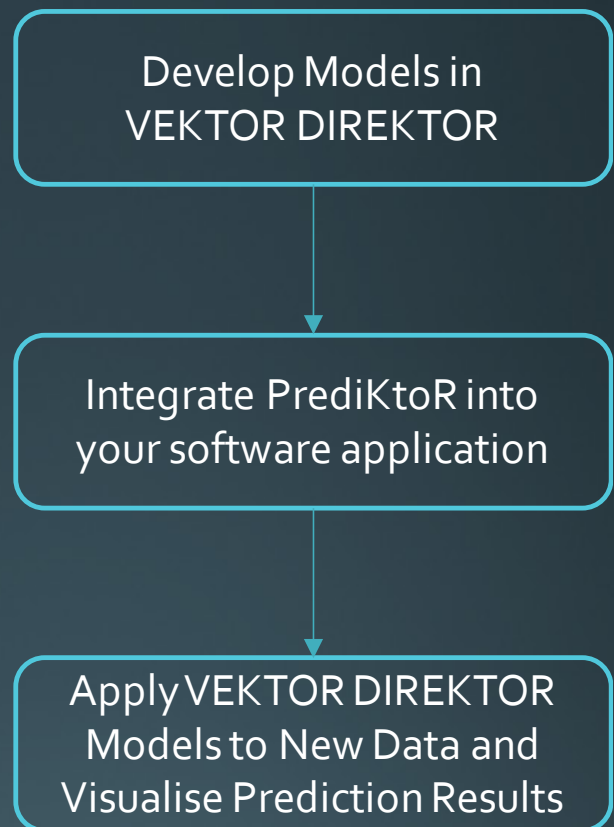

What is PrediKtoR?

PrediKtoR by KAX Group is a platform independent dynamic link library (dll) application that can be integrated into your current software environment for using models developed in VEKTOR DIREKTOR.

Why Use PrediKtoR?

If your spectrometer (or other multivariate sensor) can utilise the power of multivariate models for predictive and classification purposes, PrediKtoR can be integrated into your software environment providing greater value to your hardware.

The PrediKtoR Advantage

	PrediKtoR Advantage
Operating System	PrediKtoR is platform independent meaning it can be integrated with Windows, LINUX and other platforms.
Integration	KAXG provides full documentation and example code to make the integration task simple.
Support	KAXG experts can provide integration assistance to accelerate implementation times.
Compliance and Data Integrity	GMP version available that only allows models approved in VEKTOR VAULT to be used.
Lifecycle Documentation	Fully documented development and validation based on GAMP© 5 model.
Models	PrediKtoR is a universal engine that allows the use of PCA, PLSR and classification models.

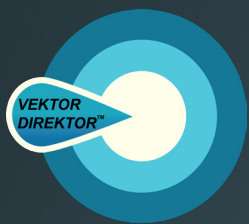

Contact info@kaxgrp.com for more information about integrating PrediKtoR into your software application.
